Skyler Wang

wang.sk@northeastern.edu — linkedin.com/in/skyler-wang-neu — skyomni.github.io — Boston, MA

Education

- **Northeastern University** Boston, MA
  Bachelor of Science in Electrical Engineering — Expected December 2028 ***GPA: 3.89***
  - **Relevant Coursework:** Embedded Design, Circuits & Signals, Computing Fundamentals for Engineers, Fundamentals of Networks

Technical Skills

- **Electrical & Embedded**: AC/DC circuit analysis, breadboarding, sensor interfacing, GPIO, I2C, Raspberry Pi, Arduino, wiring, soldering
- **Testing & Digital Design**: Oscilloscopes, multimeters, waveform generators, data acquisition, LTspice, Intel Quartus Prime, FPGA schematic-based logic design
- **Programming & Software**: Python, C/C++, MATLAB, Kivy, Microsoft Excel
- **CAD & Fabrication**: SolidWorks, Onshape, AutoCAD, Rhino 3D, PCB milling, 3D printing, laser cutting, mechanical assembly

Engineering Experience

- **Northeastern University College of Engineering** Boston, MA
  FYELIC Red Vest — First Year Engineering Learning and Innovation Center *Jul. 2026 – Present*
  - **Engineering Support & Troubleshooting**: Support 20–30 students per shift with electrical and embedded projects, troubleshooting AC/DC circuits, wiring, Raspberry Pi systems, and prototype designs.
  - **Technical Training & Equipment**: Train students on soldering and 3D printing equipment, supervise safe fabrication practices, and explain troubleshooting and prototyping techniques.
- **Northeastern University EXP Makerspace** Boston, MA
  Makerspace Explorer *Jun. 2026 – Present*
  - **Fabrication & Prototyping**: Support 15–30 users per shift with PCB milling, soldering, 3D printing, laser cutting, and mechanical assembly for engineering prototypes.
  - **Equipment Training & Maintenance**: Train users on Bantam Tools PCB milling equipment, diagnose fabrication problems, and maintain tools to support repeatable prototype assembly.
- **Northeastern University Oakland Makerspaces** Oakland, CA
  Print Media Assistant *Sep. 2025 – Apr. 2026*
  - **Process Improvement & Organization**: Reduced equipment checkout time by 50–60% by developing a centralized barcode-based equipment tracking system.
  - **Workshop Coordination**: Coordinated equipment, materials, and hands-on workshops while supporting users with makerspace tools and project preparation.
- **Queensborough Community College (CUNY)** Queens, NY
  Researcher — CubeSat Environmental Sensing Project *Jul. 2024 – Aug. 2024*
  - **Embedded Sensor Development**: Assembled and tested a CubeSat sensor system using BMP280 and MPU6050 modules; recorded pressure and temperature measurements at one-second intervals.
  - **Research & Data Analysis**: Used Python to analyze sensor test data and temperature–altitude trends; co-authored a paper documenting the test setup, measurements, and findings.

Engineering Projects

- **CADodiles STEM Trivia Game** Northeastern University
  Engineering Design Project *Spring 2026*
  - **Embedded System Integration**: Prototyped a Raspberry Pi Zero 2 WH system with touchscreen, MG90S servo, and WS2812B LEDs; integrated control electronics with a moving mechanism.
  - **Software & Controls**: Programmed Python/Kivy interface and GPIO controls; tested servo and LED behavior and debugged electrical and software integration issues.
