Skyler Wang

wang.sk@northeastern.edu | linkedin.com/in/skyler-wang-neu | skyomni.github.io | Boston, MA

Education

- **Northeastern University** — Boston, MA
  Bachelor of Science in Electrical Engineering — Expected 2029 — ***GPA: 3.89***
  - **Relevant Coursework:** Circuits & Signals, Embedded Design, Computing Fundamentals for Engineers, Fundamentals of Networks

Technical Skills

- **Electrical & Embedded**: AC/DC circuits, breadboarding, circuit prototyping, sensor interfacing, I2C, GPIO, Raspberry Pi, Arduino, soldering, wiring, multimeters, data acquisition
- **Programming & Simulation**: Python, C/C++, MATLAB, Kivy, LTspice, Intel Quartus Prime
- **CAD & Design**: SolidWorks, Onshape, AutoCAD, Rhino 3D
- **Fabrication & Prototyping**: PCB milling, 3D printing, laser cutting, mechanical assembly, woodworking

Work Experience

- **Northeastern University College of Engineering** — Boston, MA
  FYELIC Red Vest — First Year Engineering Learning and Innovation Center — *July 2026 – Present*
  - **Engineering Support**: Support 20–30 students per shift with electrical, embedded, CAD, and fabrication projects by troubleshooting circuits, wiring, Raspberry Pi systems, Python, and mechanical designs.
  - **Technical Training & Equipment**: Train and supervise students on soldering stations, 3D printers, and fabrication equipment while troubleshooting tools and enforcing laboratory safety procedures.
- **Northeastern University EXP Makerspace** — Boston, MA
  Makerspace Explorer — *June 2026 – Present*
  - **Fabrication & Prototyping**: Support 15–30 users per shift with PCB milling, soldering, 3D printing, laser cutting, and mechanical assembly while guiding independent prototype development.
  - **PCB Fabrication & Equipment**: Train users on the Bantam Tools PCB mill and fabrication equipment while supporting setup, safe operation, troubleshooting, and basic equipment maintenance.
- **Northeastern University Oakland Makerspaces** — Oakland, CA
  Print Media Assistant — *September 2025 – April 2026*
  - **Process Development**: Developed and implemented a barcode-based checkout system for the Oakland makerspace, centralizing equipment tracking and streamlining equipment loans for students and staff.
  - **Event Leadership**: Created, organized, and led fully booked student makerspace events by developing activities, coordinating equipment and materials, managing logistics, and facilitating hands-on workshops.
- **Queensborough Community College (CUNY)** — Queens, NY
  Researcher — *July 2024 – August 2024*
  - **Embedded System Development**: Designed and built an embedded sensing system integrating BMP280 pressure/altitude and MPU6050 motion/temperature sensors for multistory environmental data collection.
  - **Testing & Data Analysis**: Improved measurement reliability through electrical and sensor troubleshooting, then processed and visualized temperature, pressure, and altitude data using Python.

Engineering Projects

- **CADodiles STEM Trivia Game** — Northeastern University
  Engineering Design Project — *Spring 2026*
  - **Embedded System Integration**: Developed an interactive STEM learning system by integrating a Raspberry Pi Zero 2 WH, 7-inch touchscreen, MG90S servo, and WS2812B LED strip.
  - **Software & Controls**: Automated physical and visual game feedback by developing a Python/Kivy application controlling the touchscreen interface, GPIO, servo actuation, LEDs, and game logic.
  - **Prototype Testing**: Validated the electromechanical prototype through iterative hardware, software, and user testing with a multidisciplinary engineering team.
